

FRESH START FRESH WEBSITE

Fresh Start is currently in the process of updating their website! For the past 8 months, the entire Fresh Start team has dedicated their efforts to achieving GP accreditation and enhancing our websites. As part of the accreditation process and a new initiative to improve user experience, we are collaborating with Metacreative to revamp our website.

The changes will be rolled out in two stages, starting with the Fresh Start Clinic page launching today, followed by the rest of the website going live in two weeks!

What does this mean for our clients, their families and the wider community?

- Enhance user experience by establishing clear pathways between pages
- Provide additional details about our services and the individuals we assist
- Offer access to resources and information for self-education and awareness on substance use disorders and treatment options
- Expand our outreach to target specific audiences and regions facing challenges with these conditions
- Improve navigation for philanthropic individuals and organizations on our donation page, offering more insights on how your contributions support our mission and local communities.

At Fresh Start, we are focused on the future and aim to extend our reach to offer hope and assistance to individuals seeking freedom from addiction and substance use disorders.

Our priority is to ensure easy accessibility when individuals are seeking help. We extend our gratitude to Metacreative for their exceptional support and work throughout this update.
